#### THE IMPACT OF POPE FRANCIS ON THE WORLD

Pope Francis in a short time has certainly touched the world in so many ways. His homilies and prouncements have opened our eyes in a way as never before. Given below are his views on subjects that effect each of us in a very spersonal way.

"The world today is confused about what it's supposed to do with creation. Instead of safeguarding and promoting creation in a way that improves and brings happiness to humanity, the world has established "a culture of disposal" where whatever isn't useful "gets tossed out in the trash." Those designated as useless include the most marginalized, children and the elderly". On Sharing

"We must acknowledge that the majority of the men and women of our time continue to live daily in situations of insecurity fear and desperation grips the hearts of many people, even in the so-called rich countries. Not to share one's goods with the poor is to rob them and to deprive them of life. It is not our goods that we possess, but theirs. One cause of this situation, in my opinion, is in our relationship with money, and our acceptance of its power over ourselves and our society. Consequently the financial crisis which we are experiencing makes us forget that its ultimate origin is to be found in a profound human crisis. In the denial of the primacy of human beings! We have created new idols. The worship of the golden calf of old (cf. Ex 32:15-34) has found a new and heartless image in the cult of money and the dictatorship of an economy which is faceless and lacking any truly humane goal".
